

Quality

At Custom Polymers we do more than recycle and reprocess plastic, we perfect it - in fact we perfected over 350 million pounds of plastic last year.

CUSTOM POLYMERS, INC.

Custom Polymers is a global recycler and reprocessor of post-industrial and post-consumer plastic scrap. With more than 100 years of combined resin and recycling expertise, we've been buying, processing and selling commodity and engineering grade plastic materials since 1996.

We supply clean, consistent, recycled feedstocks to manufacturers all over the world as an economically viable alternative to virgin resins.

Recycle. Different.

CUSTOM POLYMERS PET, LLC

Custom Polymers PET, is a premier recycler of post-consumer and post-industrial PET.

Our state-of-the-art extrusion line pelletizes 30 million pounds of PCR PET which is qualified by the FDA for direct food contact, while our washing process produces 120 million pounds of clean RPET flake annually.

Custom Polymers PET has become the clear choice in providing recycled PET content.
